Color Palette

-  - #15803D: Primary, Victory Green
-  - #475569: Secondary, Steel Blue Gray
-  - #BE123C: Accent, Crimson Tide
-  - #F8FAFC: Background, Pearl White
-  - #0F172A: Text, Dark Slate

Explanation:

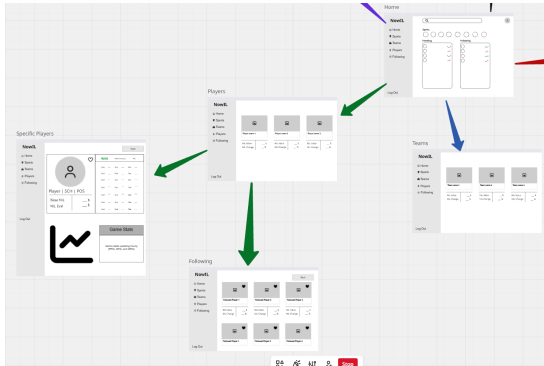

We selected Victory Green as our primary color because our website is focused on the rise (sometimes fall) of players' NIL values which we show with trendlines as seen in our logo; we highlight positive NIL deltas in this green, and negative values in Crimson Tide. The green feels clean and athletic, and we use it for our branding and navigation bar. The Steel Blue Gray acts as a good neutral color to balance the green and white colors, and it has a hint of blue making it more appealing than a simple gray. For our background we choose Pearl White since it is a softer white and easier on the eyes than a pure white while still being minimalist and simple. For our text color we used Dark

Slate, a softer black with a hint of blue to match with Steel Blue Gray.
Crimson Tide is almost exclusively used for negative NIL deltas.

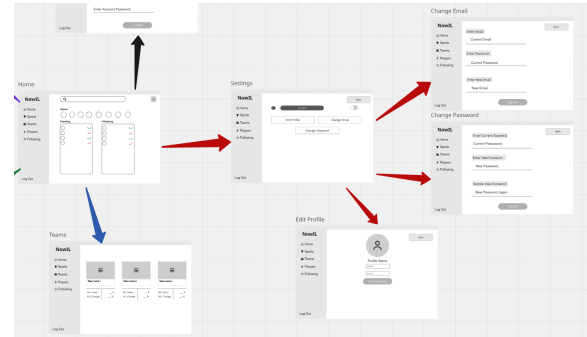

We also used [Tint & Shade Generator](#) to create alternatives of our base colors and used [WebAIM Contrast Checker](#) to check that our text had enough contrast.

quarterback.

The Predict Homepage- Sport Selected: Once a user enters the information, they will be prompted to enter relevant statistics on the player. Note: certain sports such as Golf, Soccer, Volleyball, Tennis, and Gymnastics will not account for sports statistics but will place higher emphasis on the school and division, and will ask social media based questions for branding. For purposes of this, it will just demonstrate a football

The Predict Homepage- Stats Inputted: Once a user inputs the statistics they want, an estimated NIL Base Evaluation and NIL Tier Evaluation along with an NIL Projection graph and Player Comparison is displayed based on other players performing as a similar metric.

Self Evaluations

Kaden: Did all of the LoFi screens for desktop and mobile (except Home), created lofi flows and did the Lofi Wireframe section in the document.

Melanie: Created HiFi onboarding pages, and realigned pages to 12 column grid. Created Following and Sports Pages, did HiFi section

Vanik: Created Lofi desktop pages. Created original Hifi pages for Home, Players, Teams, Sports, Following, as well as components used for them.

Joshua: Created assignment document, selected color palette and wrote color palette section. Created Miro and Figma teams and projects. Reworked and redesigned logo after feedback from several blind tests. Created LoFi Homepages. Created and applied consistent Text and Color styles for HiFi wireframe. Applied consistent spacing and margins fixing inconsistencies between pages. Simplified, decluttered, and redesigned pages. Fixed and created components to be reused throughout pages. Created Hifi landing landing page and reworked onboarding pages and sign in/up, view all player pages, and selected player page. Made HiFi design fully interactive. Create HiFi section and updated with recent pages.

Alexis: Created original concept sketch designs, reconfigured and recreated the Lofi player individual pages to be like player cards, and created her nontrivial feature (projection for NIL earnings) (Honors Option)
